

**REMARKS**

**A. Claims 1-5, 8, 11-14 and 17**

Claims 1-5, 8, 11-14 and 17 were rejected under 35 U.S.C. §103(a) based on a combination of Terry et al., U.S. Patent No. 6,996,082 (“Terry”) and Odenwalder et al, U.S. Patent No. 6,804,220 (“Odenwalder”). Applicants respectfully disagree and traverse these rejections for at least the following reasons.

Neither Terry nor Odenwalder taken separately, or in combination, discloses or suggests the transmission of a separate control channel for each [data] transmission as in claims 1-5, 8, 11-14 and 17.

In the Office Action the Examiner acknowledges that Terry does not disclose a separate control channel for each transmission. To make up for this deficiency the Examiner relies upon Odenwalder. However, the excerpts from Odenwalder relied on by the Examiner do not appear to disclose separate control channels for each transmission. Instead, it appears that Odenwalder discloses a known technique of associating a “forward” control channel with a “forward” data channel. There is no disclosure of a separate channel for each transmission.

Accordingly, it is respectfully requested that the rejections be withdrawn and claims 1-5, 8, 11-14 and 17 be allowed.

**B. Claim 6**

Claim 6 was rejected under 35 U.S.C. §103 (a) based on the combination of Terry, Odenwalder and Toskala et al, U.S. Patent No. 6,535,503 (“Toskala”). Applicants respectfully disagree and traverse this rejection for at least the following reasons.

Applicants note that claim 6 depends on claim 1 and is therefore patentable over the combination of Terry, Odenwalder and Toskala for the reasons set forth above with respect to claim 1 because Toskala does not overcome the deficiencies of Terry and Odenwalder.

Accordingly, Applicants respectfully request withdrawal of the rejection and allowance of claim 6.

**C. Claims 18 and 19**

Claims 18-19 were rejected under 35 U.S.C. §103(a) based on the combination of Terry, Odenwalder and Malkamaki et al., U.S. Patent No. 5,577,024 (“Malkamaki”). Applicants respectfully disagree and traverse these rejections for at the following reasons.

Applicants note that claims 18-19 depend on claim 1 and are, therefore, patentable over the combination Terry, Odenwalder and Malkamaki for the reasons set forth above with respect to claim 1 because Malkamaki does not overcome the deficiencies of Terry and Odenwalder.

Accordingly, Applicants respectfully request withdrawal of the rejections and allowance of claims 18 and 19.

**D. Entry of Request for Reconsideration**

Entry of this Request for Reconsideration (“Request”) is solicited because the Request: (a) places the application in condition for allowance for the reasons discussed herein; (b) does not raise any new issues requiring further search and/or consideration; (c) does not present any additional claims without canceling the corresponding number of finally rejected claims; and (d) places the application in better form for appeal, if an appeal is necessary.

In the event this response does not place the present application in condition for allowance, Applicants request that the Examiner contact the undersigned at (703) 266-3330 to schedule a personal interview.

If necessary, the Commissioner is hereby authorized in this, concurrent, and future replies, to charge payment or credit any overpayment to Deposit Account No. 50-3777 for any additional fees required under 37 C.F.R. § 1.16 or under 37 C.F.R. § 1.17; particularly, extension of time fees.

Respectfully submitted,

CAPITOL PATENT & TRADEMARK LAW FIRM, PLLC.
